DO YOUR MOBILE WORKERS HAVE THE TOOLS THEY NEED?

When you have professionals working in the field, gathering and transferring information can be a time-consuming, error-prone process. Field reports often involve handwritten notes, sketches, photos, electronic files and more. All of it has to come together and be transmitted back to the office or sent to colleagues and clients.

YOUR FIELD PROFESSIONALS NEED TO MOVE BEYOND A MIX OF PAPER-BASED PROCESSES AND DEVICES WITH LIMITED FUNCTIONALITY.

Back at the office, your field personnel and support staff might need to scan in sketches and paper documents, type up notes, transfer electronic files from one computer to another, upload photos and perhaps add annotations to images. Each step in the process takes time and introduces new chances for errors and omissions.

Small, wireless devices like Pocket PCs, PDAs and cell phones can help speed things. But to be most productive, your field professionals need to move beyond a mix of paper-based processes and devices with limited functionality. What they really need is a notebook computer with Tablet PC features and software that

streamlines the process of gathering information and transmitting it quickly and accurately to the right people and places.
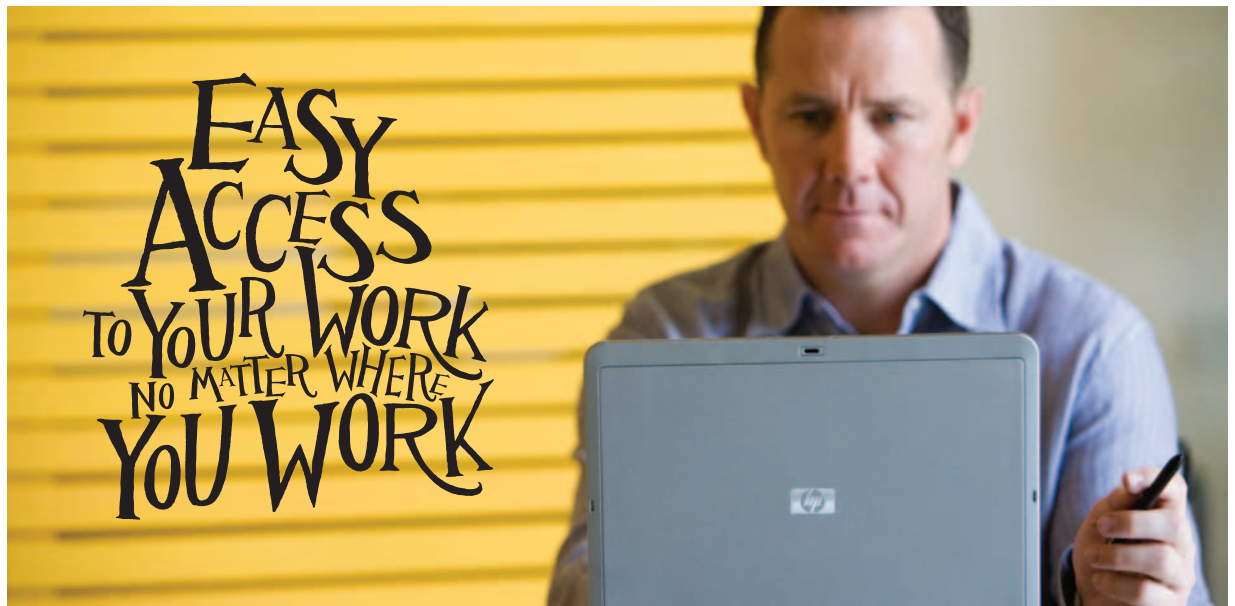

Where do you find this solution? Look to the HP Compaq 2710p Notebook PC with Field2Base software.

SIMPLIFY AND STREAMLINE FIELD COMMUNICATIONS

The HP Compaq 2710p Notebook PC with Field2Base software brings together the features and functions of a full notebook PC with tablet capabilities and innovative software designed to make field professionals more productive.

This proven hardware-software combination is built to simplify and streamline field communications. Assignments that previously might have taken hours or days to complete can now be wrapped up quickly in the field, saving valuable staff time and avoiding errors that come with manual processes.

The HP Compaq 2710p Notebook PC with Field2Base software is an ideal solution for just about anyone who works in the field—including inspectors, facilities personnel, public employees, insurance adjusters, construction managers, engineers and sales representatives.

EASY ACCESS TO YOUR WORK NO MATTER WHERE YOU WORK

Among other benefits, this field communications solution helps your staff:

- Turn paper documents into electronic files
- Dispatch pre-filled work orders to field personnel
- Reduce the chances for errors and lost documents
- Easily add photos to forms
- Reduce the need for manual data entry
- Improve customer service
- Accelerate field communications
- Use a Data Management Module to view, edit and generate reports on real-time field data (what used to only be on paper waiting to get driven or faxed back to the office)
- Help field personnel conduct business in a more professional manner

FIELD2BASE SOFTWARE

Empower your mobile workforce

Field2Base software makes the gathering and transfer of information back to the office a nearly effortless process. The field professional uses the Field2Base software to capture the many types of information—including hand-drawn sketches, annotated drawings, annotated photos, existing paper forms "smartened up" electronically and user-supplied files—to describe a specific field situation.

Upon completion of documentation, the user in the field can immediately transmit the results via securely encrypted wireless communications[1] to a home office or any individuals who need timely access to the infor-

mation. This transmission of information is delivered to the recipient as an e-mail attachment, or it may be viewed and edited in the Data Management Module or integrated directly into existing back-end systems. No additional software or hardware is required to receive the transmission from the field.

Increase productivity

Core features of the Field2Base application include:

- Document annotation—Users in the field can mark up any number of documents of various file types, including drawings, CAD documents, Microsoft Word and Microsoft Excel files, and image files.
- Sketch functionality—Unique sketching tools are available to help users create hand-drawn sketches to document issues from the field.
- Photo annotation— Users can easily take and annotate photos from within the Field2Base software without any complicated file manipulation or complicated editing software.
- File management—Field personnel have a digital archive of all communications to or from the Field2Base application.
- Handwriting recognition software—Gain features that are above and beyond standard Microsoft Tablet software.
- Electronic forms—"Smarten up" existing paper forms by turning them into easy-to-use electronic versions with the same look and feel.

HP COMPAQ 2710P NOTEBOOK PC

Get a notebook that's built for the field

The HP Compaq 2710p Notebook PC offers the functionality of an ultra-light notebook plus the flexibility of an ultra-slim tablet. Starting at only 3.7 pounds (1.65 kilograms) and 1.11 inches (28.2 millimeters) thin, and built with features for outdoor work, this is an ideal computer for use in the field.

See it all more clearly

The 12.1-inch diagonal widescreen Illumi-Lite display[2] and writing surface uses LED backlighting, is mercury-free and provides you with a slimmer and lighter notebook PC that is more energy efficient than a notebook with a standard LCD display. The chemically strengthened glass top will not wear down with repetitive use, and resists the effects of "pooling." The optional outdoor view display delivers a significantly better display appearance when working in bright light conditions.

Redefine productivity

With a dual-microphone array and optional integrated camera, enjoy video and web conferencing, video-enhanced instant messaging, and VoIP[3], and capture business card images that automatically convert to text. Your mobile professionals can use the HP 2700 Ultra-Slim Expansion Base with integrated DVD+/-RW drive[4] as a docking station in the office or take it with them in the field. And they can stay connected in more places with HP Broadband Wireless.[5]

Leverage HP innovations

The HP Compaq 2710p Notebook PC is built to protect, simplify and last:

- An array of multi-layered, customizable security solutions help defend your network, your applications and your data. The new Drive Encryption for HP ProtectTools encrypts all information on the hard drive volume so it becomes unreadable to an unauthorized person.

- Your field professionals can boost their productivity in low-light conditions with the HP Night Light that shines directly on the keyboard.

- Reliable features such as HP DuraKeys, HP DuraFinish, full magnesium alloy enclosure and HP 3D DriveGuard help the notebook go the distance.

READY TO STREAMLINE YOUR FIELD COMMUNICATIONS?

To purchase the HP Compaq 2710p PC with Field2Base software contact HP's partner, Synnex, at **www.synnex.com** or 1-800-456-4822.

To learn more about the features of Field2Base software, visit **www.field2base.com** or call 1-800-456-4822.

For detailed information on the HP Compaq 2710p Notebook PC and its broadband wireless connectivity options[6], visit **www.hp.com/go/broadbandwireless**.

1. Wireless, Internet and VoIP require separately purchased service contract. Check with service provider for availability and coverage in your area. Available in select countries only.
2. Results achieved with similarly configured PCs both using 9-cell batteries. Results may vary with 3- and 6-cell batteries, loaded applications, features, and power management settings.
3. Wireless, Internet and VoIP require separately purchased service contract. Check with service provider for availability and coverage in your area. Available in select countries only.
4. Do not copy copyright-protected materials. Intended for creation and storage of your original material and other lawful uses. Double Layer discs can store more data than single layer discs. Double-layer discs burned with this drive may not be compatible with many existing single-layer DVD drives and players. Note that DVD-RAM cannot read or write to 2.6 GB Single Sided/5.2 GB Double Sided – Version 1.0 media.
5. Wireless, Internet and VoIP require separately purchased service contract. Check with service provider for availability and coverage in your area. Available in select countries only.
6. Wireless, Internet and VoIP require separately purchased service contract. Check with service provider for availability and coverage in your area. Available in select countries only.
